PERSISTENT ORGANIC POLLUTANTS (POPs) Declaration of Conformity

6/13/2025

Manufacturer: **Name:** Smart Vision Lights

Address: 5113 Robert Hunter Drive
Norton Shores, MI 49441, USA

Directives: (EU) 2019/1021 (POP Directive)

Persistent organic pollutants (POPs), such as pesticides and some industry chemicals, which persist in the environment, or bioaccumulate through the food chain, pose a risk to human health and the environment.

In 2004, Regulation (EC) No 850/2004 of the European Parliament and of the Council on POPs entered into force. In 2019, the POPs regulation was recast into Regulation (EU) 2019/1021 of the European Parliament and of the Council.

Smart Vision Lights, as a manufacturer of articles related to LED lighting and accessories, is aware of the responsibilities for protecting the environment and human health. Based upon our established vendor management systems, we query our vendors and maintain a regular tracking of any changes or updates to the prohibited substances and restricted substances which might be applicable to the article level requirements listed in the POPs Regulation. With this approach, our products remain in compliance with the POPs Regulation and do not contain substances subject to the prohibition list in the Regulation (EU) 2019/1021 and amendments. We will continue to follow up the update of the POPs regulation and ensure the conformity of our products into the future.
